I. BACKGROUND

The recent Coronavirus outbreak has resulted in the world largely coming to a halt, immobilizing the tourism industry almost completely. Travel restrictions and social distancing continue to be enforced across the world for the conceivable future, travel-related businesses such as airlines, cruise lines, hotels, restaurants, and museums have ceased operations. With many people confined to their homes and travel and tourism businesses closed, people have turned to the next best alternative- virtual tourism.

Virtual tourism is essentially a hybrid concept- it combines both the notions of virtual reality and tourism. In essence, virtual tourism facilitates a tourism experience, without actually having to travel anywhere. It takes many different forms and comes in varying degrees of technological capability. In its simplest form, virtual tourism may comprise of a video of a tourism destination. The 'tourist' watches the video, utilizing their hearing and sight senses.
